Art Unit: 2832

DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-18, drawn to an inductor, classified in class 336, subclass 200.

II. Claims 19-37, drawn to a method of forming an inductor, classified in class 29,

subclass 602.1.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions [I] and [II] are related as process of making and product made. The inventions

are distinct if either or both of the following can be shown: (1) that the process as claimed can be

used to make other and materially different product or (2) that the product as claimed can be made

by another and materially different process (MPEP § 806.05(f)). In the instant case the inductor can

be made using print screening method.

3. Because these inventions are distinct for the reasons given above and have acquired a

separate status in the art as shown by their different classification, restriction for examination

purposes as indicated is proper.

4. This application contains claims directed to the following patentably distinct species of the

claimed invention:

- Embodiment one:

Figures 1-2.

- Embodiment two:

Figures 3-8.

Application/Control Number: 09/766,162 Page 3

Art Unit: 2832

- Embodiment three:

Figures 9-10.

- Embodiment four:

Figure 11.

- Embodiment five:

Figure 13.

- Embodiment six:

Figure 14.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Application/Control Number: 09/766,162

Art Unit: 2832

5. Applicant is advised that the reply to this requirement to be complete must include an

election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner

should be directed to Examiner Tuyen T. Nguyen whose telephone number is (703) 308-0821.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor,

Mr. Elvin Enad, can be reached at (703) 308-7619. The fax number for this Group is (703)872-9318

before the final office action, if the response is after final office action the fax number is (703)872-

9319.

Any inquiry of a general nature or relating to status of this application of proceeding should

be directed to the Group receptionist whose telephone number is (703) 308-0956.
